Professional Summary

I am a certified Flutter developer with over two years of experience in cross-platform mobile app development. I focus on creating user-friendly and well-optimized applications while ensuring clean architecture and easy-to-maintain code. I also have experience with UI/UX design, Firebase, and managing CI/CD pipelines. Currently, I'm learning PHP and Laravel to expand my skill set.

EXPERIENCE

Flutter Developer at Akodes IT Solutions, Multan

October 2022 - Present

I lead the development of complete Flutter applications, handling everything from design to state management, API integration, and performance optimization. I work closely with design and backend teams to build seamless, feature-rich mobile experiences. Staying updated with Flutter advancements, I continuously integrate new features and improvements into projects. I also conduct code reviews and follow best practices to ensure high-quality, maintainable code.

PROJECTS

I have worked on more than five projects, fully developing and contributing significantly to the rest. Currently, I'm working on two more projects.

AutoHaus Car Rental Spearheading the development of a comprehensive car booking application catering to diverse needs, from event transportation to business travel. Implemented sophisticated features, including Stripe payment integration, real-time chat, and a visually immersive 3D car model, elevating the user experience.

Folder Tree Notes Engineered a sophisticated notes application with a hierarchical tree structure for organizing voice recordings, images, and text notes. Created an intuitive user interface, facilitating efficient organization and retrieval of notes, while maintaining data integrity.

Deliver by GFL Built two apps for a parcel delivery system, allowing users to set pickup and destination locations, choose payment options (cash or Paystack), and schedule deliveries. Implemented rider tracking, a scheduling system, and real-time ride request notifications. Enhanced functionality with multiple additional features.

SKILLS

- State Management
- Problem-Solving
- UI/UX Design
- Testing and Debugging
- RESTful API Integration
- Shared Preferences
- Widget Customization
- Design Patterns
- Third-Party Libraries
- Version Control/Git
- Code Optimization
- Animations
